## EGP acquires Neograf

The leading Slovenian manufacturer of industrial packaging, EGP, is a successful growth story, even outside the borders of Slovenia.

To ensure EGP's continued development, EGP is proud to announce today the acquisition of the Croatian company NEOGRAF.

Since its foundation in 1958, EGP has made a name for itself as a supplier of the highest quality packaging materials through constant developments driven by innovation and technological excellence.

NEOGRAF specializes in the production of cardboard boxes and has a wealth of experience. Today, NEOGRAF is one of the most innovative Croatian production companies in the industry.

The acquisition of Neograf is in line with EGP's strategic growth plans, which are based on continuous investments in technology and product development. To ensure future development and further increase the satisfaction of our business partners, EGP with the acquisition is adding to our knowledge and experience in future key areas of service.

By acquiring Neograf, the EGP Group will become a supplier not only of cardboard packaging, but also of leaflets and paper packaging. The combined know-how, technological capabilities, and production volume of EGP and NEOGRAF, with the resulting diverse and high-quality product portfolio, will ensure EGP even greater competitiveness in this highly competitive market.

NEOGRAF
